John Brophy
Science Teacher
Elizabeth G. Lyons Elementary School

A 26-year resident of Randolph, John Brophy's role as science teacher at the Elizabeth G. Lyons Elementary School (Lyons ES) is very special because he attended the school as a child. He also attended the Randolph Community Middle School (RCMS) and went on to graduate from Randolph High School (RHS) in 2008.

After graduating, Mr. Brophy earned his Bachelor's Degree in History from UMASS Amherst. He then decided to become a teacher and returned to UMASS Boston for a Master's Degree in Education, and completed his internship at the John F. Kennedy Elementary School (JFK ES) in Randolph.

Mr. Brophy is a continuous learner. Since beginning as a science teacher at the Lyons ES he has kept up his own education by taking a variety of science courses at Bridgewater State University. He particularly enjoys studying astronomy, physical science, and engineering.

Mr. Brophy is an active member of the Lyons ES community. Both he and Mr. Dawson have been running a before school Chess Club twice a week for several years now. Mr. Brophy also holds an annual Science Fair for 5th graders, and this year he was one of the District Judges at the Vocabulary Bowl.

We are fortunate to have Mr. Brophy in our school district as a dedicated educator at the Lyons ES and a proud resident of Randolph. Thank you, Mr. Brophy, for your commitment to Randolph Public Schools.
